A note from the Chair:

Our June meeting was held at the premises of Cut Above tools in Seven Hills where our members were treated to a very informative and fun workshop on how to look after our garden tools. Members were encouraged to bring along a few tools so they could be shown how to sharpen and keep our tools in tip-top condition. We were also able to purchase items on the day and all in all everyone had a fabulous time. Feedback from our members was so positive that we are looking forward to making this an annual event.

JUNE BIRTH FLOWERS

ROSE

Roses are known as the 'Queen of Flowers', loved and treasured all over the world. This woody perennial flowering plant is admired and grown for its beauty and fragrance.

You have the choice to plant potted roses year-round or bare-rooted roses from now until the end of July. Roses prefer a rich, loamy soil or a high-quality potting mix, and a feed with **Sudden Impact for Roses** every eight to ten weeks throughout the growing season.

HARDENBERGIA

With dainty white and purple flowers and masses of dark green foliage, Hardenbergia will attract plenty of native butterflies, birds and bees along with charm to your outdoor spaces.

Find a sunny position with dappled shade to plant them. They suit light clay to sandy soils that are dry with good drainage. Once established feed with **Bush Tucker** each season, and **GOGO Juice** once per month.
